**THE MILLENNIUM RESIDENCES
AT WINTHROP CENTER**
MASSACHUSETTS, THE US

This collection of 317 luxury residences opened officially last year, but there is still a mix of one- to three-bedroom units that are available. The residences occupy the 35th to 62nd floors of Winthrop Center, which is a 62-storey mixed-use development that also has offices and amenities such as a residents-only club. Health and wellness is a key feature of this development, so residents can expect to find eco-friendly appliances such as a Wolf induction cooktop and a built-in Sub-Zero refrigerator in their kitchen. They will also have access to a team of expert trainers, nutritionists and instructors; a wellness club for people and pets; and a culinary programme by Michelin-starred chef John Fraser to enhance their daily routines and deliver a holistic sense of well-being. Some of the residences also come with a flexible space that can be configured to be a home office, media room or exercise hub. Winthrop Center is located on Devonshire Street in the heart of Boston, steps away from world-class shopping, dining and entertainment destinations and with convenient access to the city's green spaces, neighbouring towns, and historic and cultural landmarks.

Price: from US\$1.575 million via MP Boston
